

nexi dynamic currency conversion (DCC)

For an unlimited shopping experience

Shopping abroad can often mean converting to your home currency. With Nexi DCC, your customers will automatically be shown their home currency when making cashless payments – in your physical shop as well as online. For simple shopping, better service and satisfied customers.

DCC: BETTER SERVICE FOR YOUR CUSTOMERS, BETTER SERVICES FOR YOU.

With Nexi DCC, the amount to be paid is automatically converted to the home currency of the customer, which saves them from having to try to calculate in their heads. But nothing changes for you as the merchant, since the payment amount is settled, as usual, in your own currency.

Our service supports up to 55 foreign currencies and is available for payments made with Mastercard®, Visa, Maestro® and V PAY. It works at the POS in your shop as well as in e-commerce as the Nexi e-DCC version.

Nexi DCC nicely rounds off your customer-oriented service portfolio. Simply order our international payment solution as an additional function of our terminals or for Nexi Payengine. Very simple, very secure.

YOUR BENEFIT AS A MERCHANT

- Customer-oriented: greater transparency and service with cashless payments.
- Low cost: less reduction (discount) for you.
- Sales boosting: tap into international customer potential online.

ALL THE BENEFITS AT A GLANCE

- Up to 55 currencies – with Mastercard®, Visa, Maestro® and V PAY.
- Local currency or home currency? Your customers decide for themselves with each transaction.
- Best-rate guarantee: billing at the day's best exchange rate.
- Less reduction (discount) for each financial transaction.
- No additional expense – neither in the payment process nor in your accounting.
- No exchange rate risk: settlement is carried out in your own local currency.
